Slavik V. Jablan Matematički Institut SANU Kneza Mihaila 36 11001 Beograd, p.p. 367 SERBIA

 $31 \ {\rm August} \ 2009$ 

Dear Dr. Jablan,

Yesterday I amused myself by using METAFONT to make a font based on one of your modular tiles. The font has your four characters, ' $\uparrow$ ', ' $\uparrow$ ', ' $\uparrow$ ', ' $\uparrow$ ', and ' $\clubsuit$ '; I also added two experimental ones with a neutral center, ' $\uparrow$ ' and ' $\clubsuit$ ', ' $\bullet$ '', ' $\uparrow$ ', ' $\bullet$ '', '

Would you object if I make the source code for this font freely available on my website and on the CTAN archive for  $T_{EX}$  users? Of course I would credit you for the idea.

Sincerely,

Donald E. Knuth Professor Emeritus of The Art of Computer Programming
